

LET'S FINISH THE JOB

HARRIS' ACCOMPLISHMENTS FOR IBEW MEMBERS

MANUFACTURING

- Harris is bringing back American manufacturing for the first time since the 1950s!
- The Inflation Reduction Act and the CHIPS and Science Act offer billions of dollars for manufacturing...with labor standards that *truly* encourage using unions
- For the first time, there are labor standards on federal tax credits
- The CHIPS and Science Act is rebuilding America's supply chain of critical components such as semiconductors that are used in everything from smart phones to refrigerators
- The Inflation Reduction Act means using US-manufactured wind and solar components will be cheaper than importing them...another historic first!
- IBEW helped write these laws...they prove Harris wants union labor to be the face of American manufacturing
